ISX
Year Models: 2003-2007

Power Cylinder Update:
Reviva incorporates a carbon scraper ring, or commonly known as an anti-polishing ring, for better engine performance. The cylinder liner has an additional steel ring that is inserted on the counter bore of the cylinder liner. This scrapes the carbon from the sides of the piston which aids in reducing carbon polishing on the cylinder walls. These improvements are designed to decrease oil consumption, lower oil filter contaminants and reduce DPF regeneration.

All Reviva engines are assembled in the USA.

To ensure our engines will stand the test of time, Reviva uses OEM or equivalent pistons, rings, bearings, valves and gaskets.
